DETAILED ACTION

1. The rejection under 35 USC 112, first paragraph, for lack of enablement is withdrawn in light of the arguments and affidavit provided in the papers filed on Sept. 13, 2006.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Robert M. Barrett on Sept. 22, 2006.

The application has been amended as follows:

Claims 1-4 (Canceled)

Claim 5 (currently amended): An isolated or synthesized polynucleotide ~~comprising~~ consisting of a nucleotide sequence encoding the polypeptide ~~identified by~~ of SEQ ID NO: 1; or a ~~fragment thereof comprising~~ SEQ ID NO:3 .

Art Unit: 1638

Claim 6 (canceled)

Claim 7 (currently amended): A vector containing the ~~nucleotide sequence~~
polynucleotide of claim 5 operably linked to a promoter.

Claim 8 (currently amended): A non-human cell containing the vector of claim 7.

Claims 12-18 (canceled)

Claim 19 (currently amended): A method of producing cocoa beans with increased cocoa flavor peptides, the method comprising transforming a cocoa cell with ~~one or more of the nucleotide sequences of claim 5, vector of claim 7~~ and generating at least one cocoa plant from the transformed cell, and producing cocoa beans from the transformed plant, wherein the beans express said polypeptide.

3. The following is an examiner's statement of reasons for allowance:

After consideration of the affidavit provided by the Applicant on Sept. 13, 2006, the Examiner is withdrawing the rejection under 35 USC 112, first paragraph, because it would not require undue experimentation to determine if the claimed polypeptides can be used to improve chocolate flavor.

The amendments to the claims were required to limit the scope to the peptides that were discovered in the instant application to ensure that the claims do not read on the full-length vicillin protein from cocoa beans because the full-length vicillin protein is already known in the art; for example, US Patent No. 5,770,433 teaches the larger protein (SEQ ID NO:1) which comprises the instant SEQ ID NO:3. However, the prior art does not teach or fairly suggest the peptides of instant SEQ ID NO:1 or instant SEQ ID NO:3.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Cathy K. Worley whose telephone number is (571) 272-8784. The examiner can normally be reached on M-F 8:30 - 5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Anne Marie Grunberg can be reached on (571) 272-0975. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
